

# How to set up and take Password Pupil tests on a Mac

password

## Step 1.

Check your **screen size** and **resolution** satisfy the **minimum** requirements. Check your Mac display settings are set to default.

13" (inch) minimum screen size.  
Minimum resolution: 1280 x 768

Diagonal screen size laptop/PC	
25.40 cm	10 inch
27.94 cm	11 inch
30.48 cm	12 inch

## Step 2.

Check your **internet speed**.  
<https://fast.com/> or <https://www.broadbandspeedtest.org.uk/>  
0.1 Mbps (100KB) download and upload speed available, or more than 1.0 Mbps if being remotely invigilated using MS Teams, Zoom, Skype or similar.

INTERNET SPEED  
**0.1** Mbps  
Agent office testing

INTERNET SPEED  
**1.0** Mbps  
Remote invigilation:  
MS Teams, Zoom etc.

## Step 3.

Check you are using the **correct internet browser**.

Chrome

Safari

Firefox

## Step 4.

Check you are the **only internet user** in your home. Turn off all other programmes and internet connected devices while you take your test.

## Step 5.

Navigate to the Password platform using the link here. Press command + shift + F  F to enter full screen. You must be in full screen mode before starting your test.

<https://passwordplatform.englishlanguageTesting.co.uk/>

Login Screen

Insert your unique test code here.

While taking the test, **do not click anything outside the test screen**, including pop ups and notifications as **this will interrupt (stop) the test.**
